

Introduction to Tesla's

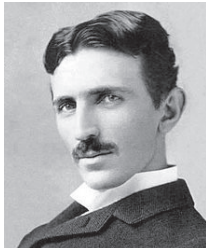

Introduction

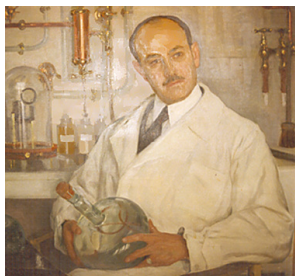

Today we would like to introduce you to Tesla's Innovative Technology and the important role it can play in our lives today.

For any of this to make sense to us it is important to understand what we are and our relation to the world we live in. Since the understanding of Quantum Mechanics in the 1960's it has been a lot easier to understand the relation of atoms to life but what has been missed or ignored is the relation of the Body Electrics and the role it plays in our lives today.

Nikola Tesla was a brilliant man who understood the body electrics and the finer frequencies that we emit and receive. He was responsible in the development of the subtle energy world of radionics with Albert Abrams.

He developed The Multi-wave Oscillator with George Lakhovsky which was a device that put a wide variety of frequencies into the cell to bring it into balance. They believed that living cells are like batteries; the nucleus holds the positive charge and the cytoplasm carries the negative. If cells were irradiated with a range of electromagnetic oscillations, they could be "recharged" and thus rejuvenated. A range of frequencies is necessary because the cell respond to different frequencies.

In his book, "The Secret of Life," Georges Lakhovsky said, "the cell is an electromagnetic resonator, capable of emitting and absorbing radiations of every frequency." He stated, "the nucleus of the cell consists of a tubular filament, chromosomes and mitochondria, made up of insulating materials

and filled with a conducting fluid containing mineral salts found in sea-water."

"These filaments are comparable to oscillating circuits endowed with capacity (the ability to store energy) and self-inductance (energy flowing through a cell causes a magnetic field to be set up around it) and therefore capable of oscillating according to a specific frequency." He realized cells worked as a conductor and had energy flowing through it, thus causing a magnetic and electromagnetic field.

The subtle energy field of the body provides the instructions for the reproduction, division, and function of all cells. Any disruption in the integrity of this critically important bio computer and subtle energy field can be devastating to the correct and effective functioning of all organ systems, especially the brain.

"Health is equivalent to oscillatory equilibrium while disease is characterized by oscillatory disequilibrium."

Six months before Tesla died he handed his health healing discoveries over to a Young Physicist Ralph Bergstresser who later went on to develop rocket fuel for NASA. Ralph built a number of Multi wave

Oscillators exactly to Tesla's specification and used another of Tesla's designed technology to enhance the Multi-wave Oscillator. This he had tested by NASA and found that it was putting out frequencies beyond the ability of the testing equipment at both ends.

This again verified the fact that our cells vibrate at different levels from each other and have different needs of frequencies. This also tells us that negative frequencies can affect different cells and parts of our bodies.

Robert Becker the author of Body Electrics and Cross Currents wrote: "We now live in a sea of electromagnetic radiation that we cannot sense and that never before existed on this earth. New evidence suggests that this massive amount of radiation may be producing stress, disease and other harmful effects all over the world by interfering with the most basic levels of brain function."

Tesla for saw that these events would take place, this drove him to find a free energy source which he did. Unfortunately he was financially destroyed by the bankers of the day including the burning of his laboratories.

Thankfully Tesla's discoveries and his technology live on today to negate the effects of negative oscillating frequencies that disrupt our lives today.

Tesla's Innovative Technology's is based on Tesla's original work and helps us today to counteract the very things that Robert Becker talked about "the sea of electromagnetic radiation."

The House Kit

To assist people cover their house, car, phones, water and bodies, Tesla's products help you to enjoy the atmosphere your body craves for. This is a once only lifetime purchase. It will last you the rest of your life. It is transportable, when you move house you easily take it with you.

The HOUSE KIT consists of:

- 4 Phone Tags - alters biological effects coming from mobile or cordless phone transmissions.
- 2 Personal Pendant - strengthens the auric field, thus helping to alleviate the bio-energy effects of some man-made EMF/EMR.
- Pocket Plate - helps with minor pains or bruises & can be used to alter the taste of water.
- Car Plate — helps alter the aggressive fields coming from the electronics in cars.
- House Plate - helps households cope with Geopathic Stress, EM Radiation & air ionisation.
- The Stabiliser - fits on to a power cord and turns the chaotic frequencies in the wiring to coherent.
- The Water Kit - puts life force into tap water, tastes & feels like rain water (no ongoing costs.)
